PROFESSIONAL SUMMARY

Electronics and Communication Engineering student with hands-on experience in **embedded systems, PCB design, and power electronics**, complemented by internships in **HVDC semiconductor systems and VLSI design**. Skilled in developing hardware-driven and IoT-based solutions, with a strong interest in building real-world electronic systems and exploring advanced semiconductor technologies.

SKILLS

Programming	C, C++, Python, Embedded C
Hardware & Embedded	Arduino, ESP32, Sensor Interfacing, Motor Drivers (L298N), IoT Systems
Core Electronics	Embedded Systems, Power Electronics, Digital Electronics, Analog Electronics, VLSI Basics
PCB & Design	PCB Design, SMD & Through-Hole Components, Circuit Design & Debugging
HDL & VLSI	Verilog, RTL Design (Basics), Digital Circuit Simulation
Tools	MATLAB, Arduino IDE, Blynk IoT

EXPERIENCE

06/2025 to 07/2025 **Intern**

Hitachi Energy Technology Services Private Limited – Chennai, India

- Worked on an **IGCT PCB Design Maintenance Project**, focusing on high-power semiconductor applications
- Gained hands-on exposure to **PCB design concepts**, including component layout, SMD vs through-hole technologies, and circuit maintenance
- Analyzed and supported **Insulated Gate Commutated Thyristor (IGCT)** based systems used in HVDC and power electronics
- Assisted in **design validation and troubleshooting** of PCB modules in industrial applications
- Developed understanding of **power electronic systems**, including converters, rectifiers, and inverter circuits
- Collaborated under the guidance of engineering professionals, demonstrating strong **problem-solving and adaptability**

06/2025 to 12/2025 **Intern**

Taras Systems and Solutions – Remote

- Completed intensive training in **VLSI design and verification methodologies**
- Worked with **HDL languages (Verilog)** for digital circuit design and simulation
- Gained understanding of **RTL design, functional verification, and timing analysis**
- Performed **simulation and debugging of digital circuits** to ensure design accuracy
- Learned concepts of **ASIC design flow and semiconductor design processes**
- Developed strong foundation in **digital electronics and hardware description modeling**

07/2024 to 06/2025 **Volunteer**

Rotaract Club of Prince Shri Venkateshwara Padmavathy Engineering College – Chennai

Associate Club Service Director:

Duration: [Jul 2024 – Jun 2025]

- Assisted in planning and executing **club service initiatives and member engagement activities**
- Coordinated with teams to organize **events, meetings, and internal programs**
- Contributed to improving **member participation and collaboration within the club**
- Supported smooth functioning of club operations through **effective communication and teamwork**

Chief Sergeant-at-Arms:

Present

- Responsible for maintaining **discipline, order, and smooth conduct of meetings and events**
- Managed **event logistics, attendance, and session coordination**
- Ensured adherence to **club protocols and structured execution of activities**
- Played a key role in supporting **leadership team and overall event management**

EDUCATION

Expected in 05/2027 **Bachelor of Engineering: Electronics Communication And Engineering**
Prince Shri Venkateshwara Padmavathy Engineering College - Chennai

PROJECTS

Smart Pillow – IoT-Based Thermal Regulation System

- Built a smart system using **ESP32 and Peltier module** for heating and cooling
- Implemented **real-time temperature monitoring** with sensor integration
- Enabled remote control via **Blynk IoT platform**
- Designed efficient power system using **buck converter and Li-ion battery**

Ocean Guardian – IoT Environmental Monitoring System

- Developed an **IoT-based system** for monitoring environmental/ocean conditions
- Integrated sensors for **real-time data collection and analysis**
- Implemented **wireless communication using microcontroller systems**

- Designed solution for **marine monitoring and pollution detection applications**

HoloFact – 3D Hologram Projection System

- Designed and developed **HoloFact**, a 3D hologram projection system using reflective pyramid optics
- Created a **low-cost visualization setup** to display floating 3D images
- Optimized **viewing angles and light intensity** for improved holographic clarity
- Demonstrated applications in **interactive and educational display systems**
